Subject: UK National Stem Cell Network (UKNSCN) Interim Bulletin - Three Imminent Events

Dear Colleagues,

UKNSCN INTERIM BULLETIN - **THREE IMMINENT EVENTS**

1] BRITISH CARDIOVASCULAR COLLABORATIVE MEETING ON STEM CELLS: UCL, LONDON, 24TH SEPTEMBER (**TOMORROW**)

If you are based in London, or happen to be there on business tomorrow, you may wish to consider sparing a couple of hours to attend the next meeting of the British Cardiovascular Collaborative which has just come to the attention of UKNSCN. This will take place at UCL on Taviton Street from 10am to 2pm (nearest tube station is Euston). The programme is attached to this bulletin for reference, and includes Philippe Menasche from Paris speaking on the present state of basic and translational research on stem cells in the heart. To register, please contact Mrs Vanessa Perrin at v.perrin@ucl.ac.uk.

2] UK STEM CELL BANK HYPOXIA TECHNICAL FORUM (25 PLACES AVAILABLE): BRIDGEND, SOUTH WALES, 12TH OCTOBER

If you are interested in hypoxic, continuous-culture environments and their application in stem cell culture and research, you may wish to register for this one-day event being organised by the UK Stem Cell Bank and hosted by Ruskin Technology Ltd based in Bridgend, South Wales. Places are limited to just 25, and interested delegates are invited to register by **Tuesday 29th September** by completing the attached registration form and submitting it to Lyn Healy at the UK Stem Cell Bank (e-mail: Lyn.Healy@nibsc.hpa.org.uk). A letter of invitation, including the programme for the day, is attached to this bulletin for reference.

3] HFEA ANNUAL CONFERENCE: LONDON, 1ST OCTOBER

You are reminded that the Human Fertilisation and Embryology Authority's (HFEA) annual conference is taking place next week on 1st October at The Grange St Paul's Hotel in London, from 10am to 5.15pm. Whilst the programme will be of greatest interest to clinicians working in the fertility sector, there are a couple of break-out workshops which will be of interest to the stem cell research community on *Consent to Research* and *Future Research Developments Impacting Upon Fertility Treatment*. View the link below for further information and registration, noting that places are limited.

[Further Information and Registration](#)

Yours sincerely,

Ben Sykes
Executive Director, UKNSCN
